

<b>Module</b>	<b>Analysis of Spatial Data - GIS</b>
<b>Code</b>	MSLS_AF-53
<b>Degree Program</b>	Master of Science in Life Sciences (MSLS)
<b>ECTS Credits</b>	5
<b>Workload</b>	150 h: Lectures 38 h; Group Exercise 32 h; Workshop 4 h; Self-study 76 h
<b>Module Coordinator</b>	<p><b>Name</b> Luuk Dorren</p> <p><b>Phone</b> +41 031 910 22 57</p> <p><b>Email</b> <a href="mailto:luuk.dorren@bfh.ch">luuk.dorren@bfh.ch</a></p> <p><b>Address</b> Bern University of Applied Sciences, School of Agricultural, Forest and Food Sciences, Länggasse 85, 3052 Zollikofen</p>
<b>Lecturers</b>	<ul style="list-style-type: none"> <li>• Dr. Luuk Dorren</li> <li>• Christine Moos</li> <li>• Christian Ginzler (WSL)</li> <li>• Mark Günter</li> </ul>
<b>Entry Requirements</b>	<ul style="list-style-type: none"> <li>• ArcGIS (obtainable from the teaching staff ) must be installed successfully on the own laptop</li> </ul>
<b>Learning Outcomes and Competences</b>	<p>After completing the module, students will be able to:</p> <ul style="list-style-type: none"> <li>• understand, how Geographical Information Systems (GIS) can make a significant contribution to challenging projects in a spatial context;</li> <li>• design spatial samplings</li> <li>• consistently integrate (mobile GIS based) field recordings and existing spatial data into a GIS</li> <li>• carry out complex spatial and thematic analyses for environmental problem solving</li> <li>• present the resulting information in meaningful maps, reports and graphics</li> </ul>
<b>Module Content</b>	<ul style="list-style-type: none"> <li>• Introduction and principles of GIS</li> <li>• GIS methods und methodologies for data acquisition and validation</li> <li>• GIS tools for spatial data processing and consistent data storage</li> <li>• Advanced spatial and thematic queries and statistics</li> <li>• Complex analyses of surfaces and networks</li> <li>• Automation of spatial analyses with ArcGIS-ModelBuilder</li> <li>• Remote sensing with satellite images, aerial photographs and LiDAR</li> <li>• Data collection with a mobile GIS and GPS</li> <li>• Creation of meaningful, appealing maps, reports and graphics</li> <li>• Introduction to SAGA-GIS, Quantum GIS, GIS with standard Office software</li> </ul>

<b>Teaching / Learning Methods</b>	Lectures, guided exercises, case studies, self-study
<b>Assessment of Learning Outcome</b>	1) Successful completion of individual weekly GIS attestation exercises (pre-condition for passing the module) 2) Written final exam (100%)
