JOHNSON & JOHNSON ARE...
- The world's sixth-largest consumer health company
- The world's largest and most diverse medical devices company
- The world's sixth-largest biologics company
- And the world's sixth-largest pharmaceuticals company

THE GRADUATE OPPORTUNITIES WE HAVE AVAILABLE INCLUDE:
- Internships, traineeships and entry level positions
- Supply Chain Leadership Development Programs (GOLD, Step In)
- Finance Leadership Development Programs
- Procurement Leadership Development Programs

Looking for a graduate role where you’ll be recognized for the value you bring to your work? A place where you can drive your career in a range of flexible directions? Where co-workers share your passion for helping others? Johnson & Johnson are looking for talented graduates to take on full-time roles after graduation. We offer structured on-the-job learning, leadership development opportunities, and managers who are committed to developing the next generation of leaders within our global organization.

We believe in recognizing and rewarding excellence. Our Total Reward package is made up of five main elements – salary, benefits, work/life balance, recognition and learning development.

JOHNSON & JOHNSON IN SWITZERLAND
Currently Johnson & Johnson Switzerland has nearly 6'500 employees in engineering, research & development, manufacturing finance, marketing, sales, and many other fields. In Switzerland, Johnson & Johnson is located in several cantons (SO-TI-VS-BL-NE-ZG-BE-SH). With the company’s acquisition of Cilag AG, Johnson & Johnson has been a presence in Switzerland since 1959.

From this time, Schaffhausen has been an important location for the development and production of Johnson & Johnson pharmaceutical products. The company’s business units are also represented at more than a dozen additional locations: Crucell Switzerland AG, whose activities include the development and production of an Ebola vaccine, is located in Berne.

Around 1,000 employees are responsible for the development and manufacture of innovative implants and other technologies for the Medical segment in Le Locle, Neuchâtel. DePuy Synthes is also active in the Medical segment. It operates several production plants in Switzerland and has its EMEA headquarters in Solothurn. And an important strategic hub for Johnson & Johnson is Zug, home to one of the company’s most important global financial and logistics centers – 100 markets are supplied from Zug.
