

Certificate of Advanced Studies (CAS)

Digital Forensics & Cyber Investigation Specialist 1

The CAS Digital Forensics & Cyber Investigation Specialist 1 provides you with the knowledge and skills needed to perform network forensic analysis, malware analysis, data analytics and visualization, and e-discovery.

Objectives

This CAS will prepare students for career opportunities in a variety of organizations:

- Law enforcement – Federal agencies, KAPOs
- Military and government – CERTs, cyber-troops
- Finance industry – fraud/cybercrime investigation teams
- Insurance industry - cyber insurance claims investigation
- Large enterprises – security and incident response teams
- Consultancy and audit – e-Discovery, accounting, «Big Four»
- IT security service providers and product vendors
- Private boutique digital forensic and investigation firms

Target Audience

The CAS DFCI Specialist 1 builds on the Fundamentals and Advanced CAS semesters, and is designed for experienced forensic investigators who want to increase their technical skills in digital forensics and cyber investigations or who want to transition into the field of digital forensics and cyber investigations.
