### Module Coordinator

- **Name**: Dr. Dominic Blaettler
- **Phone**: +41 31 910 22 50
- **Email**: dominic.blaettler@bfh.ch
- **Address**: Bern University of Applied Sciences, School of Agricultural, Forest and Food Sciences, Laenggasse 85, 3052 Zollikofen

### Lecturers

- Dr. Dominic Blaettler
- Dr. Ingrid Fromm
- Further lecturers HAFL
- Invited guest speakers

### Entry Requirements

Basic understanding of development economics, policies and institutions as well as macroeconomics is required

### Learning Outcomes and Competences

After completing the module students will be able to:

- discuss development strategies, analyze the conditions under which development and innovation in agriculture and forestry can be achieved, and identify policies and institutions that support these processes;
- anticipate that there are conflicts between the various stakeholders in development as well as constraints to policy making and development process;
- apply methodological skills in social network design and interview technique.

### Module Content

Development policies and programs are formed by a wide range of actors with diverging interests, including farmers, forest users, community organizations, private companies, local development agencies and public organizations. Policy makers in national and local governments are expected to act as facilitators who – following the rules of good governance – consult those actors that are affected by these policies (the stakeholders) and involve them in the formulation of policies and development programs. Policy makers use instruments such as funding mechanisms, programs and projects as well as taxation and subvention policies to bring actors together and involve them in development processes. Development is often guided towards the application of new knowledge and technologies (innovations) to achieve improvements in economic and social practices, but also need to consider criteria of equitable and pro-poor development as well as environmental sustainability. The success of development and innovation policies, however, does not only depend on its appropriate formulation and implementation, but also on the socio-economic, cultural and environmental framework conditions, the general structures and rules that guide people's behaviour and the social networks people are embedded in. The module will introduce up-to-date economic, sociological and policy approaches that allow an in-depth understanding of the processes that foster and inhibit development and innovation in the agricultural and forestry sector.

1. Development strategies: from import substitution, over structural adjustment to integrated development, livelihoods and collective action.
2. Stakeholders in development and innovation: the relationship between state, market and civil society in agricultural and forestry transition processes.
3. Development policies and programs: Rationale and criteria for policy making, approaches to policy analysis and formulation, steps in the policy formulation.
### Teaching / Learning Methods
Lectures, seminars in which students present and discuss a) basic concepts and b) learning elements elaborated from lecture inputs, guest lectures, workshop (social network analysis), case studies, and self-study.

### Assessment of Learning Outcome
1. **Interview-Assignment**: carry out interview *The Role of different stakeholders in rural development and innovation*; interview is video-taped & discussed in class (20%)
2. **Discussion Summary**: moderation of expert input leading to a written summary of the session, with an own conclusion (20%)
3. **Social Network Analysis Workshop/Assignment**: conceptualise and design a social network using VisuaLyzer (software taught in class); result presented & discussed in class (20%)
4. **Exam (oral)**: assessed are quality of information (technical terms, keywords, concepts, etc), creative contribution to discussion (linking issues, different views, pros/cons, own opinion/experience etc), structuring/facilitating discussion (40%)

### Bibliography

### Language
English

### Comments
The following sequences are compulsory for students: interview, presentation of videos; civil society & innovation; networks & innovation, plus Workshop; innovation & extension; innovation & agriculture; innovation & forestry. For details on compulsory sequences, please refer to the detailed schedule of the module, which will be uploaded on moodle before the start of the module.
